The home version of AutoCAD first became commercially available in 1986 as AutoCAD LT, while professional/multiuser version AutoCAD Pro was released in 1988. Today, AutoCAD is widely used by architects, designers, engineers, draftsmen, and other professionals. Besides being available as a stand-alone desktop application, AutoCAD is also available as a web app, an iOS app, and as a video game. History of AutoCAD AutoCAD, like the other products by Autodesk, was created by an international group of Autodesk employees, working mostly from the company's downtown San Rafael, California,

headquarters. Former Autodesk employee Jim Fee was a strong advocate of the product, and he encouraged his employees to build and enhance the program. The first version of AutoCAD was released in December 1982, as a desktop application running on microcomputers with internal graphics controllers. AutoCAD ran under the CP/M operating system, although a Windows version was soon created. The hardware needed for AutoCAD included an 8086-based microcomputer with a graphics display adapter (VGA) with 256K of RAM memory, a mouse, and a printer. AutoCAD LT was introduced in 1986, and ran on microcomputers with VGA displays, allowing users to work with the program on a variety of computers. Professional/multiuser version AutoCAD Pro was released in 1988, and was only available on minicomputers with an internal graphics adapter (ISA), but lacked many of the features found in LT and the native MS-DOS versions of AutoCAD. AutoCAD Web Edition was launched in 2002, and although designed to run in a web browser, it is a stand-alone product. It provides a limited browser-based functionality for users

who are not willing to install the full-featured AutoCAD product on their workstations. In 2007, AutoCAD was also available as an Apple iPad app, as a Windows Mobile app, as a web app, and as a Kindle app. In 2007, Autodesk began allowing users to purchase AutoCAD as a subscription, where users pay a recurring fee each year, with an option to pay a one-time fee for a perpetual license. Users can opt to keep their existing license, or obtain an annual subscription. On February 27, 2009, Autodes

In August, it was reported that Price was charged with battery for allegedly slapping a teenage neighbor. As previously reported, Price gave an interview to Huffington Post recently, revealing that she has never been arrested nor charged with any crime. "People have come out and said that I was arrested, or that I've been involved in a crime. I have never been arrested, and there have been no charges or any kind of investigation," she stated. "So, anyone who says that is lying. I have never been arrested, so they're just trying to sensationalize the situation." Price also addressed the charges that she hit a teen neighbor.
