1. It can be configured to show a visual logo. 2. The background color can be customized to match any skin color. 3. The background color can be customized to match any skin color. 4. It can show up to four emblems on the Buddy List. 5. It can be used as text or as an image. Version 1.3.1.0: 1. Make sure to use the latest version of the Flash Media Embeds plugin before attempting to configure the new media emblem. 2. If you use a skin with a video background, it is recommended to use the Skin Selection module in the plugin to ensure that only one skin is used for emblems. 3. If you use Skin Selection, it is recommended to use the URL Correction module in the plugin to ensure that only one skin is used for emblems. 4. You may not want to use the auto-configure feature of the plugin. You can still go to Configuration > Media Embeds > Emblems and customize the emblems. 5. If you experience issues with the plugin not loading emblems, please try disabling "preload media emoticons". Version 1.2.3.4: 1. Some users reported that the emblems did not load properly. This has been fixed. 2. Some users reported that the emblems did not load properly. This has been fixed. 3. Some users reported that emblems do not show up on their skins. This has been fixed. Version 1.2.3.3: 1. Some users reported that emblems do not show up on skins. This has been fixed. Version 1.2.2.1: 1. Some users reported that the emblems did not show up on their skins. This has been fixed. 2. Some users reported that the emblems did not load properly. This has been fixed. 3. If you experience issues with your emblem, please try using the "Clear Cache" button located in the plugin menu. 4. Some users reported that the emblems do not show up on skins. This has been fixed. Version 1.2.1.0: 1. Some users reported that the emblems did not show up on their skins. This has been fixed. 2. Some users reported that the emblems did not load properly. This has been fixed. 3. If you experience issues with your emblem, please try using

You may have noticed that the Cylance is displaying an emoji of two boxes in place of the standard "Avatars & Emblems" icon in the buddy list and is also using the new "Collectable" icon for your reminders. We're making both of these new icons fully functional by default in this release! English (United States) Spanish Changed This app has had a few changes. Some new features have been added, some added or altered and some has been fixed. New Added This release fixes an issue where Invite button when entering the app and sometimes becomes not clickable after a long period of time. Altered Added In order to enable the bonus feature of the Invite button to show the number of users currently connected, the software has a new API called via API and provides you with the current number of users connected via this method. Fixed This release fixes an issue where the video and audio was showing as grey and not working in some phones. New This release includes new features. Some of them are listed below: Add-on and Use Options - Settings of the app are now placed in the app settings. Previously, this was a walled off menu. Invite button- You will now be able to invite any friends to the app that are not in your private list, without having to use the friends list. Save and Use Saved Contacts - You can now save your friends list that will be stored in the contacts. You can restore the contacts at any time from the "Settings". See details below: Change Log v1.9.1 Added Added support for multi-device usage with device ID support. iOS Fixed Fixed the incorrect name of the option "Show/Hide Video." v1.9.0 Fixed The audio and video is now showing as grey. v1.8.1 Added Added the option "Use apps settings" to allow the option to use the app settings instead of saving/restoring the contacts. This will be enabled from the next release onwards. v1.8.0 Added Added the option "Use apps settings" to allow the option to use the apps settings instead of saving/restoring the contacts
