## Virtual TimeClock Pro Crack Download

Virtual TimeClock Pro is an advanced software utility that enables you to easily keep track of your employees' activities by creating a database with all the necessary information, including vacation times, reports, and payrolls. Fast setup and professional interface The installation procedure is a fast and simple job that shouldn't impose any difficulties. Once launched, you can create a new company file by specifying the company name, along with the administrator full name, password, and key hint. In the following stage you can populate the company file with users by writing their personal information, including email address, social security number and emergency contact. Manage employee data and generate reports Employment details focus on the status (active or inactive), hire date, full or part time job, wage, automatic deduction, department, and overtime. Plus, you can write notes with personal observations or reminders, and print data. Users can be organized into different groups, and their properties can be edited anytime. What's more, you can create a backup scheduler, take note of breaks and lunches, review company registration data, or verify, compact and reindex the database. It's also possible to edit department names and members, create leave awards, manage overtime information, examine program logs (e.g. audit, backup, error), generate a wide range of reports (e.g. activity in summary or details, daily timecard), administer assigned shifts, allow users to change their password, disable password protection for administration, and so on. Evaluation and conclusion No error dialogs popped up in our tests, and the software tool didn't hang or crash. It left a small footprint on system resources, using low CPU and RAM to work properly. Taking everything into consideration, Virtual TimeClock Pro proves to be a feature-rich app for creating and managing a database for employees. MaxClock Express is an advanced software tool that
