AutoCAD for Windows, a free plugin to AutoCAD LT, which enables Microsoft Office users to draw using their own computer and monitor. AutoCAD for Mac, a Mac OS X version of AutoCAD, released on December 1, 2012. AutoCAD for iOS, a plug-in for AutoCAD LT 2013, and also available as an app on iOS devices. AutoCAD LT 2013 for Android, a tablet version of AutoCAD LT 2013, which is available as a free download on Google Play. Other products Through the 2010 launch of AutoCAD Architecture, Autodesk began licensing the AutoCAD LT platform to other companies who wished to develop applications for AutoCAD. However, the next AutoCAD release, AutoCAD 2015, was developed with a base of ObjectARX, with no connection to AutoCAD LT. Autodesk introduced AutoCAD 100 in May 2007, which provides Autodesk's drawings and data without the need to purchase the more expensive AutoCAD package. In August 2009, Autodesk announced a new version of AutoCAD called AutoCAD 2009, a Direct Modeling product that integrates modeling software such as 3ds Max and Maya with AutoCAD. The new interface and command structure are intended to encourage a more fluid and collaborative drafting and modeling workflow. It also allows the user to have a separate drawing space, not tied to a shared space. In April 2015, Autodesk announced that they would no longer provide support for the older software versions, and would no longer charge for upgrades. This included all Windows products and AutoCAD LT. In May 2015, Autodesk released AutoCAD 2016, a continuation of the direct modeling approach first introduced in 2009. In June 2016, Autodesk re-released AutoCAD Architectural Desktop along with AutoCAD LT. In February 2017, Autodesk released AutoCAD 2017 (a continuation of direct modeling) and updated Autodesk Inventor. In addition, Autodesk released online access to many Autodesk and third-party libraries, including a collection of CAD models for consumer electronics. On April 7, 2018 Autodesk announced the release of AutoCAD Architecture 2018 as a free update to AutoCAD Architecture 2017.
