
Cisco 7920 Configuration Utility Fixed

[Download](#)

The Cisco Wireless IP Phone must be configured and managed in the same way as other IP phones. You install the Cisco 7920 Configuration Utility on your computer and connect. If your phone is stable, then you can use it for SIP traffic. But if there are problems, then you can check the settings of the SIP protocol over the FTP protocol. Three things need to be done. 1. Create FTP access to the phone and configure the FTP protocol. 2. Check if the phones are properly connected to the network. 3. Check SIP over FTP protocol settings. Make sure you have an FTP program on your computer.
