Your mission is to help the alien, Angel, who is under the control of the villain, and destroy him. After that he will be freed and your base will be protected. Remember, don't take actions on your own, there is not enough time to think before. Your help is required right after the invasion of your base. To gain help you have to perform many tasks. First you will have to feed the Angel. To do that, you will have to inspect every piece of food. If you want to feed him you have to check every one of them. You will find 6 bowls. You should check which bowl contains food. If you are lucky there will be the smallest piece of food inside. If it is, you can eat it. After eating it the Angel will gain health. He will be cured completely when it reaches 100. He will then be ready to fight. You have to cure him and remove the evil eye that has been placed there. From the top you will see the eye. To get rid of it you have to hit it with a baton. The baton can be found in the bottom right corner. Each hit will destroy the eye. You will get the weapon when the Angel dies. Use it to destroy the arsenal and blow the boxes. Aim carefully and you will be able to destroy the arsenal. Enter the tubes and destroy the arsenal right behind the light. The tube will appear on your right hand side. After the arsenal and the boxes are destroyed, you will receive your reward and you will be saved. Remember, to get help you must feed the Angel, cure him and remove the evil eye. For this purpose make sure that you get the 6 bowls, check the food and you will cure him. After the mission, there will be an arcade game where you will need to move your ship as fast as possible. It will be very difficult and you will need to use all your skills to pass the obstacles. You will have to control the ship in an incredible way. You must use special things to make the ship fly. Practice, practice, practice! You can increase your score in two ways. First, if you fly a long time and use the broken ship the score will be added. If you fly fast, the score will increase. Think before you do anything and be patient. The game will last 7 Levels. In the first level you have to fly to the right platform. You can get to it using doors. The doors can be broken. In the second level you will have d41b202975
