Features Key:

An Action RPG with Real Time Combat using a command log Use the command log and perform actions at the same time while responding to real time situations. Cast powerful skills and boost your attacks with the combination of your weak and strong areas in the real time action scenes.

- Realistic 3D Graphics An incredible combination of character performance and scene presentation, enriching the sense of real-time feeling of the combat scenes with rich 3D graphics. The vast world with complex graphics is designed from the viewpoint of the players, so you can directly perceive the scenery from a player's perspective on-foot.
- Full Customization "Tasteful and highly detailed customizations" is a T&C principle of "no magic meshes" that is applied to game items, such as armors and weapons. It aims to create a world in which your character in the game has its unique "Taste" by refining the details of the combinations of the existing items. Players can freely customize the appearance of their character and select equipable items that fit their characters.
- Redesigned Field System The most important ARPG system "ABT" that continues in Steel Division: Normandy '44 is rebuilt. Players can enjoy stronger battles and greater potential by performing attacks and commands correctly in the mega-map. In addition, "ABT AVAILABLE" (available until the unit has no hit points), "ABT LOOSEN" (reduce the defence points of the enemies based on hit-points), and "ABT CONTINUE" (enforce the tactical decision based on the purpose) are added.
- Architectural Soundtrack The game's music by both a composer and an audio director provides a wonderful overall tone to the game and is suitable for its dramatic story.
- Intuitive UI The advanced user interface that enables the users to enter a command log at the same time during the battle and encourages user operations. As a result, you can achieve a fluid battle experience.
- Compliant Content

-IndieGamesLab Greetings Geeks! Today I would like to share with you some of the impressions I have to write about the new fantasy action RPG, Tarnished Soul - Black Moon. I am sure that most of you have already played the previous game released a few months ago, Tarnished Soul - White Moon, and tried to complete the goals set by the Elder in the Lands Between. And if not, I suggest that you start immediately with White Moon, because the main story and main quest of the game will have a critical contribution to the Black Moon. In order to make you curious I must tell you that the game is still in development and is being played by many of us. I do not know when it will be officially released, but I could tell you that probably it will be around the same time as the previous White Moon, although the release of the game has not yet been planned. Having said that, you should know that the story of Black Moon is the story of a parallel world. This is also the story that will help you to understand the legends and epics in the Lands Between. The main storyline and main quest of Black Moon in the Lands Between are connected to a myth related to the end of the Elves, and the meeting of the first humans in the ancient lands. All this you will find in detail in the Dev Report to the blog posted soon by the developer. On the other hand, I would like to tell you about the design of the game world. The game world is based on a 2D orthogonal map that allows the player to freely navigate and explore different locations and areas, as you would do in most RPGs. They are similar to the locations in both previous games. The game world is divided into different continents. Each continent is divided into a variety of regions that are connected by bridges. When you travel to a new region, there will be some indication to know that you have entered a new continent. As a new feature, when you are in a region with a bridge, you will be able to travel to any continent that is linked to that region. It is possible to travel between any continent in the world, but you are not able to travel back to the start continent. All the continents are connected to each other through different portals. To move between regions you will need to travel to the portal of a particular region. It is a very similar system to that of

- The archive you have just extracted contains a separate folder called "ranger". In this folder, you should find the "ranger_version" file. You may simply double click on this file to open the website "The Elden Ring". You have just cracked the game.

- For troubleshooting, extract the.exe and.dll files

from the .zip file. Locate the "UseFile" registry entry located at [HKEY_CURRENT_USER\Software\Hypixel\Slot2\E
