See Strickland, 466 U.S. at 690, 104 S.Ct. 2052 ("[C]ounsel's perspective at the time of sentencing is not rendered inadequate either by the fact that it does not include presentation of mitigating evidence or that it fails to winnow out weaker arguments for ferretting out some possible reversible error."). Under Strickland, the "basic thrust of the law" is to treat ineffectiveness claims under the prejudice prong "in light of the procedures utilized in the State courts." 466 U.S. at 696, 104 S.Ct. 2052. Thus, the Court rejects the notion that a claimant has an independent cause of action for the alleged ineffectiveness of postconviction counsel. Accordingly, Jackson has failed to assert a valid independent claim of ineffective assistance of postconviction counsel and, as a result, his habeas corpus petition must fail. III. CONCLUSION For the foregoing reasons, we find that the District Court properly dismissed Jackson's § 2254 petition

〖PC Version〗 on Jun 13, 2014 at 8:58 PM 〖The Elder Scrolls V Skyrim - Special Edition〗 Remastered game of the year. Since I can remember I have wanted to play Skyrim and got this game for christmas. However, while playing it first time, I got many complaints that "Skyrim's graphics are not so good, the game is too hard", but about two months later I still didn't realize that Skyrim's graphics aren't bad at all. In this game, there are only horses, puddings and lots of snow. The graphics are not great, but somehow it fits the landscape of Skyrim. The main character's model is not good, but by downloading the Creation Kit, which is easy to use and have many effects, it looks much better. The screen is really wonderful; you could see and watch the beauty of the countryside. The graphic rendering, the environment, the weather and the particle effects all look great. The sound effects are really great, but sometimes you heard too many noise, such as the sound of horse's hooves, snow falling and wind blowing. It is better if they reduce the volume of the noise. The battles were good, if you choose to fight a dragon, not only you must pay attention to the enemy, but also you should be aware of your surroundings. If you are hit by an arrow, don't run into an enemy or fall into a trap, or you are dead. The last time I fight I had been in the mountains, I was as an enemy so I was not aware of my surroundings, and was an easy target to enemies, so I was easily defeated. To show the players the real feeling of the landscape, there are many items on the screen, such as snow, wind, a dragon, a farm, a body and so on. Of course there are many items in the world. However, they are not the actual things we see in the game, it is all fake. For example, only the part of the farm shown on the screen is really a real farm. Another example is the farmhouse, some items you can see, such as a bed, horses and the farm's garden. However, there are too much items in this kind of farm, and it can't fit in the screen. I liked exploring the world, I often try to enter a dungeon to find some gold or weapons. bff6bb2d33
