Recently appointed deputy prime minister Tan Sri Muhyiddin Yassin has been accused of being a “Pakatan Rakyat puppet” by Datuk Seri Dr Wan Azizah Wan Ismail, who is also the deputy prime minister’s deputy president. “He’s a puppet in the Barisan Nasional’s hand. He now acts as the BN deputy president so he will be its mouthpiece,” she said after launching the All Malaysiakini Congress Youth. She said in the last three years, there had been several attempts by Muhyiddin to form the government despite being on the opposition side, adding he was most recently chosen to help Pakatan Rakyat to form the government in Kedah. “This time round, with the opposition not in the state, he (Muhyiddin) is bowing to Pakatan Rakyat and wants to be the deputy prime minister. “I call on Malaysians not to entrust the deputy prime minister of the country to those who are so puppets in the hand of the BN,” she told reporters after launching the congress. — BernamaQ:

WORDPRESS - How do you make customized Login? I am new to WORDPRESS and want to know is there a way to customize the login to make the user registration and login more user-friendly and simple. For example, is it possible to make the custom registration and login like the same page? A: It is possible to do this, it is just a plugin (a login plugin which you can create yourself) that was not created to do that so there is no "built-in" way to change the process. With all of the PHP tutorials and demos out there you should be able to make a login plugin pretty quickly using the information available. There is a site that has a great collection of Wordpress plugins, WpLocker is a free one that allows you to control your login page on all pages, I find it has worked very well for the last several site I have built. But if you create your own plugin you will have more control over the login screens and processes, etc.
