L.Carpenito Piani Di Assistenza Infermieristica [Pdf Ita] Medicina [Tntvillage.Scambioetico] L.Carpenito Piani Di Assistenza Infermieristica [Pdf Ita] Medicina [Tntvillage.Scambioetico]. A: I'm not sure what you're trying to do in this case, but in the comments you mention that the problem could be solved by manipulating the characters directly. The "may it be" characters are actually the Unicode HANGUL SYLLABLE KIH-KIH. Since you read the file like this String line = File.ReadAllText(@"C:\file.csv"); you're reading the file line by line, so that means your last line will actually only contain HANGUL SYLLABLE KIH-KIH. Since you mention that the data is right after the HANGUL SYLLABLE KIH-KIH, you could then try changing the code to String line = File.ReadAllText(@"C:\file.csv").Remove(0, 27); Now remove the bytes up to the HANGUL SYLLABLE KIH-KIH and then read the rest from where you started to read the file. Here's a quick look at the news and a little snow ahead of Wednesday, March 11: — A Washington Post front page story this morning examines the "glacial pace" of progress in the federal government: "In the three years since Congress completed an \$800 billion stimulus package designed to slow the economy, the Obama administration has achieved little of its core agenda for reviving the economy and creating jobs....The biggest piece of legislative business left to be finished is repealing the health-care overhaul, but the plan is stalled in Congress." — A recent Pew report found that "most Republicans" don't think the stimulus package worked. Read this report for details. But this is sure to make it harder for the president to sell his next economic plan: "Overall, just 7 in 10 Republicans and Republican-leaning independents think the stimulus package worked. Just 2 in 5 Republicans and Republican leaners think the stimulus was better for the economy than not doing anything at all; 3 in 5 say it was worse than doing nothing. A narrow majority
