As I mentioned before the image/file have the same pattern. If you can tell me how to get them I can download them and use PHP's uniqid() or something like that to remove the same parts from all of them and get them as unique IDs. If I know how to get the information I could send you the information in this form: idfile1,idfile2,idfile3,idfile4 And you could loop them and remove the same parts of them. A: If you already have a uniqid() output then this should work:
