Sooryavansham Full Hindi Movie.Q: How to read file name in the order in which I write them Is there anyway to read the files in the same order in which I have wrote them? Like I have this file in this folder :

Program.csv - contains filenames : Program.csv - Program1.csv - Program2.csv etc I want to read the filenames using for loop not by their name only. File f = new File(fileName); String fileName = f.getName(); A: If you want to do it in a loop, use File.listFiles() to get the list, then File#getAbsolutePath() to get an absolute file path, then File#getCanonicalFile() to get a canonical name that represents the file. for (File file : new File("").listFiles()) { String path = file.getAbsolutePath().getCanonicalPath(); String name = file.getName(); System.out.println(path + " : " + name); }

However, if you just want to read the files in order, use java.nio.file.Path and java.nio.file.Files. Path path = Paths.get("Program"); for (File file : path.getParent().listFiles()) { String name = file.getName(); System.out.println(name); } Q: How to load image from http to URL on iphone? My code is: - (void)displayImage:(UIImage \*)image forState:(UIControlState)state { // Set up the URL that will receive data NSURL \*url = [NSURL URLWithString:@""]; // Set up the request for the data NSURLRequest \*request = [NSURLRequest requestWithURL:url]; // Start
