Worked for a laptop owner who suffered at the beach. She was sitting there alone, in the dark. And it was a security camera. With a security camera, one can see to the laptop owner's life without occupying her. The idea was to watch on a security camera with no human intervention. From this, it happened that you are tied to a criminal organization. It is necessary that you clear the island in order to learn about this organization. - "Light it ~ terashi-oni" is a game where I tried to make as clear as possible the visuals and an atmosphere of a dark island. It is very important to survive at the island. - There are 20 to be completed in Challenge Mode and super-speedrun mode. - You can play the original levels made by an external editor, Tera Basic. - You can save your progress at the game server with Steam Cloud. * Steam user information is necessary for Steam Cloud. About the Game Elements: There are many such stealth action games including, for example, Assassin's Creed. This is a game where I tried to make the gameplay like a spy novel. The fact that you are silent and that you become an invisible person is the change from the preceding games. Your health is represented by your flashlight battery. Your flashlight battery is the only weapon, but it has no effect on characters. It is very important to manage your flashlight when you want to survive. Besides, there are many puzzle elements in the game. Like the evaluation of the situation; judgment of the map position; judgment of the enemy. - The flashlight is the only weapon. - You can use it to search, as a means to solve some puzzles, and as the main element of the game. It is said that a flashlight is a simple weapon, but it can deal various damage to the enemy. - Like the game element of, for example, Dead Trigger or Kingdom Rush. - The possibility of hiding the flashlight is an element of action-puzzle. By using the flashlight, you can manage the situations as if you were invisible. * All features of the game are under development. * It is planned to add functions in the future to be more enjoyable.
