Several companies compete for sales of AutoCAD Activation Code and its variants. Some are long-established, including Autodesk, Trimble, and MicroStation. Others, such as Altium, Sensei, Synchro, and Siemens PLM Software, were created after 2000. The competitive market is characterized by fierce rivalry between Autodesk and Trimble, as well as against Siemens and its sister company, Siemens PLM Software. Autodesk claims that many of the competitors can only offer free CAD software, while others use similar proprietary software and processes. Use of AutoCAD and related products by different industries is growing rapidly, as the market has expanded from specialized CAD engineering and maintenance applications to include architecture, space exploration, entertainment, gaming, transportation, manufacturing, and construction. One of the most widely used applications of AutoCAD is architecture. According to the Bureau of Labor Statistics, architectural and engineering services direct support the construction, maintenance, and alteration of buildings, the design of facilities and utility systems, and the production of all kinds of design drawings and specifications. It has been estimated that U.S. architecture and engineering services employ more than 2.8 million people in that industry. Many of these architectural firms are small, one-person operations. That means that individual architects and draftsmen are doing much of the hard design work. The following list shows the current leading architectural software vendors. AutoCAD-based applications, including major versions of AutoCAD, Architectural Design Suite, Mechanical Design Suite, Electrical Design Suite, and Civil 3D, support these formats. AutoCAD LT In AutoCAD LT, the engine is identical to AutoCAD, but it has a limited user interface. AutoLISP can be used to extend functionality. ObjectARX AutoCAD's ObjectARX allows extending AutoCAD's functionality by writing code in a proprietary programming language that is similar to C++. It is a subset of C++ with only a few differences. ObjectARX is a C++ class library, which was also the base for: products extending AutoCAD functionality to specific fields creating products such as AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D third-party AutoCAD-based application There are a large number of AutoCAD plugins (add-on applications) available on the application store Autodesk Exchange Apps. AutoCAD's DXF, drawing exchange format, allows importing and exporting drawing information. See also AutoCAD Architecture References Category:Autodesk Category:Auto CAD ca3bfb1094

Newtown home a 'temple of darkness' A NEWTOWN, Conn. — A woman charged with killing a mother and her three daughters in her home where a mass shooting took place at a Connecticut elementary school tried to keep her husband out of the bathroom, a sheriff's official said Wednesday. Yale University graduate and family friend Shannon Guess Richardson was charged last week with three counts of capital murder in the Dec. 14 slayings of the mother, her daughters and herself at the home of the slain girls' mother, Nicole Hockley. The Associated Press The bodies of the mother, 34-year-old Jacqueline B. Baker, and her daughters, 15-year-old Sydney A. Hirschfeld, 14-year-old Jessica L. Richardson and 7-year-old Avielle A. Robertson, were found in their beds on Dec. 14. Richardson was found dead in the bathtub. In an interview at her home in Newtown on Wednesday, Richardson's boyfriend, Brian Joseph Ficcadenti, 50, said the woman tried to keep her husband out of the bathroom. He said Richardson told him she was worried about him "looking in the medicine cabinet." Ficcadenti said he didn't believe Richardson knew about his affair with another woman, according to the Hartford Courant. He also told the newspaper that Richardson said her relationship with the husband "was the real problem." Ficcadenti said he doesn't know if Richardson took any of the family's guns, which included a .38-caliber revolver and three rifles, the paper said. Authorities have said one of the girls was killed with a .22-caliber rifle and the other two were shot with a handgun. They haven't said what was used to shoot the mother. The sheriff's office said it also had a full report from Richardson's autopsy, which is pending toxicology results. The doctor who performed the autopsy told The Associated Press that it appeared the mother and girls had been shot after Richardson was shot. Police said Richardson told her husband she had gotten into an argument with his ex-wife and had bought the gun to protect herself. He told detectives that he came home that day, saw Richardson in bed, and left when she told him she was going to shoot herself. He said she appeared to be asleep. He told police he did not know where she had gone or why. Police have said they
