A large crowd of shouting demonstrators swarmed near the port of Piraeus on Saturday, which was one of the country's most striking manifestations of anger at the new coalition government's austerity measures. They clashed with riot police who responded to calls by the crowd and then the crowd responded by turning on shops owned by members of the Greek governing party. The protest came a day after thousands of people marched through the streets of Athens against a new round of cuts introduced by the cabinet.Accelerator mass spectrometry: a new quality control method for the determination of cobalt and chromium in blood samples by electrothermal atomic absorption spectrometry. A control procedure for the determination of cobalt and chromium in blood by

electrothermal atomic absorption spectrometry has been developed using a vacuum nebulizer and a new atomic absorption spectrometer equipped with a medium-capacity furnace, based on the Ektron 6000 EDX analyzer. This technique has been applied for the determination of cobalt and chromium in whole blood, hemolysates and plasma. The accuracy of the method and its analytical characteristics have been compared with those of the standard addition method by atomic absorption spectrometry, using oxygen as the combustion gas.1.
