ball (Fr) Loved Ones (Ld) Nightborn (ME) Chaos Monster (Fd)

Teleporting (S) Energy Drain (FR) Whirlpool (Fd) Blizzard (Dd) Twilight Fiend (Fd) Choose your own module. Choose a role with the same step up as your current role by character point plus 1 PP. Use it to add the indicated effect to the character you think will be most effective. The effect can be any Role Effect in the Routley/Loomis, MM (doubled for BWP), or Libby rulebooks. (Remember to add 1 PP to your character point, using the chart above.) As an example, Ranger-Fire Elementalist would have 9 CPs + 1 PP, so a Ranger-Fighter1 level, Elementalist Fire will have an effect of Elemental (FR/ME) + Effect of BWP + effect of Double MM - 6 = 12 additional bonus actions. If a character's maximum number of bonus actions would have already been reached, the character may use the new power to gain bonus actions instead. This power retains anything that the character already has that would let them use this power. It does not trigger if the character has already taken the full use of the effect that makes this power possible. Epic: An Epic is a special large creature, worthy of being won by a brave and mighty fighter. (Potential) foes must make a Knowledge (nature) check to determine whether the creature is a creature in the elemental plane or not. The higher the check, the more powerful a foe's encounters with the creature would be. The player should roll 1d8 on a d20 when building an epic creature; if the result is a 1, the creature is not an elemental—for example, an animal, a plant, etc. In a scenario in which a player has won an epic using non-elemental creature, the player may change to a creature of the elemental plane without disadvantage. When a creature isn't an elemental (as per above check) and it has a Challenge Rating of at least 4, the creature has Epic-Level Stats: Size: Huge Combat Maneuver Defense: 14 + 2 (4 per Epic Level) Speed: 30 Save DC
