It's used by designers, engineers, and architects to create 2D drawings, including engineering, architectural, and furniture design. AutoCAD is available on Windows, Linux, macOS, Android and iOS. The AutoCAD name comes from the initials of the company Autodesk, and the Greek for "I draw", A, which is the same symbol used in the company name. The product was renamed in 1999 to "AutoCAD Architecture" in order to differentiate it from

AutoCAD 2005 and previous versions. AutoCAD was originally known as MicroStation (1982–1999) and initially ran on the Microsoft MS-DOS operating system with a basic graphics mode. In 1982, MicroStation was a purely 2D CAD application, with the potential for 3D rendering. The first release of AutoCAD for the Apple Macintosh was version 1.0 on October 5, 1984. AutoCAD is a windows software application which you can run on your Mac or Windows computer. It's compatible with Mac and Windows operating system. AutoCAD is an AutoDesk or Autodesk product. External connectivity In the past AutoCAD was a significant component of a company's overall Information Technology architecture. Customers could access drawings via a

---

dedicated CAD server. Nowadays with the switch from desktop (AutoCAD) to web-based applications, no need exists for a dedicated CAD server. Using a web browser, drawings are accessed by the user, often from a server. The ability to work on the drawing from remote locations is often cited as a positive factor for the web application.

Customization and automation AutoCAD provides a suite of APIs for customization and automation. The APIs are language independent and are provided in C++, C#, Python, Ruby, VB6, VB.NET and AutoLISP. AutoCAD contains many 'macros' which are custom programs written in its programming language, AutoLISP. These can be invoked via keyboard or mouse, they are called 'Workstation Commands'. AutoLISP has become less popular since the introduction of Visual LISP, but it is still supported. The last version of AutoLISP was 4.6 and it is now available in AutoCAD as 'AutoLISP for
