One of the advantages of AutoCAD is that it doesn't require a graphics tablet, mouse, or a direct connection to a desktop computer (such as a printer), making it well-suited for mobile devices. AutoCAD mobile apps enable users to access the software through their smartphones, tablets, and other mobile devices. All of the software components required to run AutoCAD mobile apps can be installed through an app store, which adds performance and convenience. Autodesk launched a new version of AutoCAD in May 2019, AutoCAD 2020. AutoCAD for Mobile Devices AutoCAD mobile apps are available for the iPhone, iPad, and Android mobile devices, as well as smartwatches. AutoCAD mobile apps are not free, and require a subscription. iOS: AutoCAD iOS was initially available for the iPhone and iPad. The app was discontinued in December 2018. In May 2019, the mobile AutoCAD app was relaunched as the fully integrated AutoCAD 2020 mobile app. The original app was not compatible with iOS 11. AutoCAD iOS 2020 uses the Apple's Metal Graphics API, which is optimized for high performance graphics. Android: AutoCAD for Android is available on both Google Play and the Amazon Appstore. The app was first released in May 2014. Tablet: AutoCAD Mobile for tablets was introduced in 2017. AutoCAD Mobile for tablets is compatible with Android devices running Android 4.0 or higher. It was discontinued in May 2019. Operating Systems AutoCAD mobile apps are compatible with the following operating systems and mobile devices: Operating System Mobile device(s) iOS iPhone, iPad, iPod Touch Android Android OS 4.0 or higher Windows Windows Mobile 7.x Samsung Galaxy Note, Galaxy S, Galaxy S II, Galaxy 3, Galaxy Tab, Tablet PC BlackBerry BB and Torch 9800/9900 series, Curve, Bold, Tour, Bold 2 Microsoft Mobile device (not specified) BlackBerry BlackBerry Curve, BlackBerry Pearl, BlackBerries Tour Nokia Asha 202, Asha 203, Asha 311, Asha 312, Asha 501 Motorola Droid 2, Droid 4 Amazon Fire, Kindle

History In the mid-1990s, Autodesk took advantage of Microsoft's ObjectARX, a base class library for writing their own objects. In 1998 Autodesk introduced the AutoLISP language, which, for the first time, made it possible to create one's own applications in AutoCAD. In 1999 Autodesk introduced a new interface for running AutoCAD: Visual LISP (VLISP) - a proprietary scripting language for AutoCAD. In 2001, Autodesk released a plugin for Microsoft Windows that allowed users to import and export drawings in the DWG format. AutoLISP 1.0 was released, allowing AutoCAD users to write AutoCAD plugins in the AutoLISP language. In 2002, Autodesk introduced AutoCAD Architecture, an application that extends AutoCAD by creating models of buildings. AutoCAD Architecture was based on the Autodesk Architectural Framework (AAF), a product that was based on AutoCAD and then later a product developed by X Technologies. In 2003 Autodesk introduced the X-Plane product, which was an extension of AutoCAD that was intended for building/design. In 2003, Autodesk released a plugin to enable users to export drawings in the DWG format. In 2005 Autodesk began producing Windows-based office suites, including AutoCAD LT and AutoCAD Architecture. In 2006, Autodesk released the Autodesk Add-Ons product, af5dca3d97

When drawing a logo, simply import your feedback (a logo) from a paper or PDF file and your drawing is updated immediately. This eliminates the need to draw a second copy of your logo and eliminates the time-consuming editing steps to sync edits. Help: Help to get started with a Quick Start Guide. Search the Knowledge Base to find answers to your questions. Integration with third-party applications and services. New Features in Section and Paragraph: Section and Paragraph improvements deliver a more intuitive and predictable experience with your designs. Section and Paragraph drop shapes directly on the canvas without setting their offset and size. Quickly apply a section or paragraph style to the first shape of a new section or paragraph by using the STYLE command. Add elements in sections or paragraphs quickly with the new ADD FROM SECTION command. Drag and drop objects in to the LAYOUT window and see them previewed on the canvas. If you apply a shape to a section or paragraph that isn't supported by the section or paragraph style, the style is automatically updated to support the new shape. If a style doesn't support an element you're using, an error message displays when you try to add it. If you update a section or paragraph style with an existing element, the update is automatically applied to the new element. New Features in the Flyout: Quickly navigate through all settings in the Flyout without switching between objects. Save your settings with a single click. The flyout includes all available settings at a glance. New Features in the Drawing Window: Configure object presets to speed up your workflow. Configure shortcuts for the most common commands to save time. On the Fly: New features include the ability to open existing documents directly from the application with the Open (ODL) command and an object search function that shows you your current selection on the canvas. New features in the Layer Manager: An updated LAYER command lets you preview and apply layer styles to multiple layers in one step. Better handling of errors and warnings when creating or renaming layers. New Features in the Scaling Engine: A new Stairs feature for layered raster layers.
