It should be fine. Why not post your curl error? Thanks for the update, it is really nice of you to take the time and update the issue! At this time, I've been attempting to figure out a more solid & stable fix for the issue. Since I've been dealing with a few headaches lately, I was really hoping to have something worked out today. I have worked on this issue for over 3 months now, and it would really be of great help if you could take a moment to help me determine what might be the problem. I'm still very thankful for the information you've provided. It's really great to know that you care. I really appreciate it! If you get a Bad request, it is because you're not using the latest version of curl. you can download the latest version from here: .Show you all of that info when you ssh into your server .
