
Audials Tunebite Platinum 8.0.54100.0 - 2010kaiser 64 Bit

Or, click the small pencil icon in the upper right corner of the TV series part of Audials. This will put a pencil icon beside the genre. Click this icon, and select Genres. The Genres will be listed in the upper right corner of Audials. Click the pencil icon next to a genre and save your changes. These subfolders are created on the hard disk when you use Audials. The folder names are based on the data in the files. For example, the value of the name may be 5 for the last played movie, or it may be 6 for the data relating to the next movie. To do this, click the pencil icon to the right of TV series and select Movies in the genre. This will put all videos with this genre into the Movies category. Then, select Movies > Play the Movies collection (in the upper right corner of Audials, click the pencil icon to save your changes). You can type text by clicking and dragging on the status bar, and use keyboard shortcuts for selected commands. To view search, click the Search button on the status bar. To clear the status bar, click the Erase Status Bar button (green arrow). To exit Audials, click the Exit button on the status bar. For more information about the status bar, click the Help button on the status bar.
