What's New In?

Movieguer is a collection of apps. which is designed to help users organize, store and enjoy their collection of movies. The collection can be stored on a single drive, on several drives and networked. All movies can be stored on disks in various formats, including MPEG, VOB and AVI. Movieguer allows you to search movies by name, cast, director, genre, stars, release year and many more. Also, users can browse through movie lists, show a list of selected movies by a title, or browse through any particular movie by its title. It is possible to sort movies by description, price, release year and other categories. Additionally, it allows users to annotate movies and to share movies via YouTube. The following list presents a comparison of Movieguer to other programs and applications of a similar kind. What's new: • Added the option to browse by genres and actors. • Added the option to view movies by year of release. • Added the option to share movies via YouTube. Major changes: • Added a search box to find movies by name and cast. • Added a list of movies by a title and by the entire movie description. • Added an option to set your preferred width for the movie title. • Added an option to enter an alternate character encoding for Japanese. • Added the option to highlight selected movie titles for downloading. • Added a function to restart videos from the beginning. Major bug fixes: • Fixed an issue when selecting a title, width and location. • Fixed an issue when deleting all titles and restarting the software. • Fixed an issue when exiting during the main movie list. • Fixed an issue when the list is being displayed in landscape mode. • Fixed an issue when a user has already selected a movie for downloading. • Fixed an issue when there are no more disks available. • Fixed an issue when a DVD is locked. • Fixed an issue when returning to main movie list after searching. • Fixed an issue when the movie list is being displayed in landscape mode. • Fixed an issue when the user has not selected the right item to select in the movie list. • Fixed an issue when there are no more disks available. • Fixed an issue when the user has selected a movie and accidentally presses the menu button. Movieguer 1.0.1: • Fixed an issue when there are no more disks available. Movieguer 1.0.0: • Fixed an issue when the user has not selected the right item to select in the movie list. • Added the option to select the width of the movie title. • Added the option to enter an alternate character encoding for Japanese. • Added the option to add a movie to the favorites. • Added the option to display the

System Requirements For Movieguer:
