Current users have the option to update to CC or upgrade to the new once-per-lifetime pro plan for \$4.99 per month. But wait, there's more! For those who can't afford a full Adobe Creative Cloud subscription, Adobe is also offering annual memberships at a 20% discount. These include Photoshop, Lightroom, Bridge, Smart Objects, and app subscriptions. Business, Education, and Government customers have access to non-pro pricing. From the Apple support page: With the plan and pricing structure changes, which will now be phased-in over the next month or so, the software bundle pricing remains unchanged. To bring Photoshop to the web, we began with our internal WebGL porting project. This project started with the Acorn system's WebGL engine on modern hardware and a layer of abstraction that allowed us to target more than 500 devices. From there, we extended the WebGL porting project to the Windows 10 platform with 100 devices supported later. From there, we continued to add devices and platform support. Finally, we decided to build a way for anyone to port Photoshop at scale and today we are bringing the largest native web application available. Photoshop's creative engine features a design toolkit that enables you to work at all levels to craft gorgeous artwork. It's designed to let you explore ideas, learn, and experiment artistically, yet stay organized and efficient as you work. The Creative Cloud library of assets and tools is massive, built to support every possible challenge imaginable, and it's constantly updated. You can also share your work using Creative Commons licenses such as CC0 or CCBY—and everyone in the world can access and remix the assets you create. Anyone can be a Photoshop artist. 933d7f57e6
