==== *SuanShu (suchenshu) is an acronym of Sun's numerical library. It was initially written as a clone of the GNU Scientific Library (GSL) and has been gradually developed to be a suite of more and more comprehensive and efficient libraries of numerical methods and for numerical analysis. It is still in the development of APIs and for the time being the development focus will be on the modularization and the new version is still under development. At present it has been ported to several platforms, including GNU, Microsoft Windows, Linux, FreeBSD, Solaris, Mac OS X, OpenBSD, and HP-UX.
