"Phenomenal iPod video converter" I had tried a few to convert my video to iPod. But i was fed up with the time i spent doing it. So i decided to give this a try. So when i was requested to give some feedback about the tool, i could not have written better about it. It works amazing on windows 8.1. I could convert almost all kind of videos within few seconds. It also works on windows 10. I am really satisfied with the output and speed. And the results were amazing. I highly recommend it to everybody. "A first-class app" I am a convert on the go and often have to convert video. The app does a great job. When I compared it to the free one I purchased (mainly because I am on a Mac), I was impressed by the video quality. It has the perfect GUI and a range of options and features that I require. "My first trial on iTunes" I've been using this app on my Windows 8 for a week and it does its job superbly. It has all the features I need like audio track, subtitles, and so on. I am a convert for the iPod for years so I have a good idea about the conversion process. "Don't expect too much" Very disappointed with the iTunes export quality. The only reason I chose to buy the software was the video quality and compatibility. The software was able to get the video quality I needed but not on iTunes. The quality was unacceptable. But that is understandable. So I decided to just upgrade and buy from the iOS store. "The best iPod
