Because this new generation of filters is powered by Adobe Sensei, you can make changes to images in real time, and watch as they change on the screen. Think of it as a rush of visual magic. Learn what it is today, and preview it later. These new filters will be available later in the year, for Photoshop 2019. Everywhere you look in Elements, there's the AI engine at work—processing thousands of images every day for personalized search results. There's no other photo editor in the market with the level of AI and processing power that Photoshop has to offer. Sequence: A professional editing tool that analyzes the colour, texture and other elements of the sequence image and automatically enhances the overall quality of an existing image. It is especially good for editing digital slideshows and for adding special effects to moving images, which includes flawlessly matching moving objects and making merging several and long image sequences easy to achieve. Smart Objects: When it comes to an image editor, layers and the capacity to control individual layers is one of the essential features. Keep your shape layers isolated with labels, so their settings can be saved. Smart Objects take this a step further by grouping an object and all of the content within it to form a container object. No longer an "object", but a "Smart Object", the contents can be accessed and modified on a layer-by-layer basis. Smart Objects are ideal for photos, logos and graphic designs, where complexity is in the detail. Pixels: This all-purpose plug-in tool has been one of the most reliable tools in the pixel editing world for many years. It is designed to work on JPEG, TIFF and RGB (red, green, & blue) files; it is particularly good for converting files from other image formats. Photomerge: Convert one regular photo into up to 35 other images, all seamlessly merged together. The best of all, you don't have to use photos, you can automatically combine and merge any type of content. It can be used to assemble entire web sites, as well as floor plans or floor plans for homes, just anywhere images are required.
